# COXARA ANALYTICS

Unified Data, Experimentation, Forecasting & Decision Intelligence Platform

ENGINEERED FOR RESPONSIBLE INTELLIGENCE

# Our Vision & Mission

## Our Vision

To become the most trusted autonomous decision intelligence platform enabling real-time, optimized business outcomes.

## Our Mission

Democratize advanced analytics, transform enterprise data into predictive intelligence, and deliver measurable business impact using AI-driven automation.

# The Data-to-Decision Gap

## Fragmented Tools

Data, analytics, and BI tools are siloed and disconnected, creating friction and delays.

## Insights, Not Action

"Dashboard-first" analytics stop at the 'what' and 'why', failing to automate the 'next best action'.

## Broken Workflows

A lack of unified experimentation, forecasting, and automation breaks the link between intelligence and outcomes.

# Core Platform Pillars

## Data Foundation

A secure and scalable foundation with built-in governance.

## AI/ML Engine

The predictive and analytical core of the platform.

## Decision Orchestration

Automate and optimize workflows and business actions.

## Collaborative UX

A shared experience for all personas, from analyst to executive.

# A Unified Studio Experience

- **Data Studio:** The single source of truth for all your enterprise data.
- **Experimentation Studio:** A/B/n testing, simulation, and causal inference at scale.
- **Forecasting & Planning Studio:** Predict future outcomes and plan strategic scenarios.
- **Decision Automation Studio:** Automate actions and workflows based on AI-driven intelligence.
- **Domain Intelligence Packs:** Pre-built models and solutions for your industry.

# Competitive Landscape

| Feature | Coxara Analytics | NucliOS | Databricks | Foundry |
|---|---|---|---|---|
| Unified Data Platform | ✓ | ✓ | ✓ | ✓ |
| Built-in Experimentation | ✓ | ✗ | — | ✗ |
| Integrated Forecasting | ✓ | — | — | — |
| Decision Automation | ✓ | ✗ | ✗ | ✓ |
| Multi-Persona UX | ✓ | ✓ | ✗ | ✗ |

# Our Differentiators: Why We Win

## Decision-First

We are built for action, not just insights. Our platform is designed to close the loop, moving beyond the dashboard to automated outcomes.

## Unified Platform

We natively combine Experimentation, Forecasting, and Decision Automation in one ecosystem. No more stitching together point solutions.

## Multi-Persona UX

A single, collaborative experience for data scientists, analysts, and business leaders, democratizing access to powerful insights.

## AI Explainability

We focus on AI storytelling and end-to-end explainability to build the trust required for autonomous decision-making.

# Technical Architecture Overview

- **Data Connectors & ETL:** Ingest any data from any source, in batch or real-time.
- **Metadata & Semantic Layer:** A unified business view of all your data assets.
- **ML & Experimentation Engine:** The core for running predictive models and simulations.
- **Decision APIs & Workflows:** Integrate intelligence directly into your applications.
- **Monitoring & Governance:** End-to-end security and governance built-in.

Modern data platform architecture diagram

# Product Roadmap

## Phase 2

Scenario Planning + AutoML + Natural Language Query (NLQ)

## Phase 1

Data + Experimentation + Forecasting Core

## Phase 3

Full Decision Automation + Intelligence Marketplace

# Go-To-Market Strategy

### Enterprise B2B

Land-and-expand strategy targeting lighthouse enterprise accounts.

### Partner Ecosystem

Scale through System Integrators (SIs) and Cloud Marketplace players.

### Vertical Solutions

Vertical-led solution selling for specific industry use cases.

### Outcome-Based

Flexible, outcome-based pricing models tied to business value.

# Flexible Pricing Model

## SaaS Subscription

Core platform access based on a predictable monthly or annual subscription.

## Data & Compute Tier

Scalable pricing that aligns with your data volume and compute usage.

## Add-on Modules

Pay for the specific studios and intelligence packs you need (e.g., Forecasting, Experimentation).

## Success Services

Enterprise-grade support, dedicated services, and training to ensure your success.

# Take the Next Step

## 1. Schedule a Demo

Let us walk you through the Coxara platform and show you how it can solve your specific business challenges.

## 2. Begin a 3-Week PoC

Prove the value for yourself. We'll help you set up a 3-week Proof of Concept using your own data to drive a real outcome.

# Q&A

Thank You
